Notes

- a) Weighted total formula: large x 3, medium x 2, small x 1
- b) Includes trees within or adjacent to playground perimeter. Excludes street trees in public right-of-way.
- c) *(not used)*
- d) Other private/institutional facilities such as Hathaway Brown, Hanna Perkins, University School, Laurel School, and the Main Library are excluded, but have large high-quality play areas that are generally open for use by surrounding neighbors.
- e) Boulevard has wall mounted bike racks present, but rack design is barely functional and was therefore excluded, though guardrails of basement areawells serve as very functional bike racks.
- f) A portion of Onaway paved play area is temporarily being used for parking during Woodbury construction, with paved play moved to tennis courts.
